How to install the latest FTDI USB DLL driver

Instructions for Windows 7 through Windows 11

Download the files listed below.

- https://daytona-twintec.com/content/DTT/Software/CDM212364_Driver_Setup.exe

- https://daytona-twintec.com/content/DTT/Software/CDM_Driver_UninstallerGUI_v1.5.exe

1 Unplug all USB devices.

2 Reboot your PC.

3 Remove Existing Driver --> Run --> CDM_Driver_UninstallerGUI_v1.5.exe; then perform the following:

- Run the program from the installer: **CDMUninstaller.exe** as Administrator.

- Clear the **Product ID**.

- Click **Add**.

- Click **Remove Devices**.

- Close the program.

4 Reboot the PC — verify that no USB devices are connected.

5 Run --> **CDM212364_Driver_Setup.exe** as Administrator with **NO** USB devices connected.

6 Connect your Daytona Twin Tec USB device to the PC.

7 Use Device Manager to identify which COM port is assigned to your device.

8 Start your software and set it to use the correct COM port.

Tip: In Device Manager → Ports (COM & LPT) → [Your FTDI Port] → Advanced…, set **Latency Timer** to **2 ms** for faster transfers.
